1.9.9_Ruby

This chapter presents an overview of the project measures. This dashboard shows the most important measures related to project quality, and it provides a good starting point for identifying problems in source code.

1.4. Issues Analysis

Most Violated Rules

SEVERITY : ALL

Name	Language	Count
"<html>" element should have a language attribute	HTML	2
Attributes deprecated in HTML5 should not be used	HTML	1
"<table>" tags should have a description	HTML	1
For correct parsing especially in the case of multiple or embedded documents, documents should start with a document start marker	YAML	1
For maintenance reasons documents should use the same new line characters	YAML	1

SEVERITY : INFO

No Violated Rules of Severity INFO

SEVERITY : MINOR

Name	Language	Count
"<table>" tags should have a description	HTML	1
For maintenance reasons documents should use the same new line characters	YAML	1

SEVERITY : MAJOR
